

# SOLVING THE DISCONNECT BETWEEN TALENT & INDUSTRY

A 501(c)(3) not-for-profit and network supporting technicians to and through their careers. TechForce connects students with industry through scholarships, training, jobs, and meaningful real-world opportunities.

## HOW WE DO IT:

TechForce inspires students by **showing them what's possible, elevating real technician stories, highlighting career pathways, and making the industry's demand visible**, because students pursue careers more confidently when they can see themselves in the future they're working toward.

TechForce supports the next generation by showing students that skilled technicians are respected and in demand. **Through \$6 million in annual scholarships, national recognition programs like the Techs Rock Awards, and partnerships with 1,400+ schools.**

TechForce **connects students with the people and opportunities that move them forward**, meeting partners at events, building relationships with donors through scholarships, and using those same scholarships to **open doors to training and jobs so students can build meaningful, stable careers.**
